DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16 and 21-29, drawn to apparatus, classified in class 30 subclass 34.1.
 - II. Claims 17-20, drawn to a method, classified in class 83, subclass 13.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, invention I could perform a method that includes cutting all unwanted hair with the primary blades only and not using the second group of blade. The invention could also perform a method of cutting all unwanted hair with only the second group of blades and not using the primary blades.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
